To Whom it May Concern

Dear Sirs,

Re: Earthwork Solutions SW Ltd (ESL)

The following is provided to describe our involvement and assessment of the above named organisation:

We have been working with ESL for some 3 years. ESL were originally appointed to carry out drainage channel improvement works to a strategic and sensitive site which ultimately received planning consent for commercial development, subject to raising of site levels.

Working closely with the appointed geotechnical and civil engineering consultants, ESL is now appointed to deal with:

- Site preparation
- Sourcing and laying of suitable engineered material;
- Management and security of the day to day site operations;
- Interim containment and control of surface water run-off;
- Strict compliance with the issued Environmental Permit;
- Implementation of testing and monitoring equipment

This operation involves the potential import of over 100,000m³ of material with 30% completed to date.

Whilst we have no hesitation in recommending ESL's services, this reference is given in good faith and based on our experiences to date but neither the writer or the company accept any responsibility for the information and views expressed above.

Yours faithfully

For and on behalf of Eagle One Ltd
